<b>Subject:</b>	git error > remove cache retry once		
<b>Description</b>			
<p>During one of my projects i moved the git location, surf does not seem to recognize that, so that i had to remove the cache/transfer folder by hand.</p> <p>I would prefer that either Surf checks for a changed checkout uri, and if so remove the cache - or remove the cache on error automatically</p> <p>Error Output</p> <pre>--- (--- staging) typo3.surf:gitCheckout fatal: Could not parse object '46dd2b800826ac3297703378eefea9683fbea048'. Got exception "Command returned non-zero return code: 128" but rollback disabled. Stopping.</pre>
