<b>Subject:</b>	Loop information inside a For loop		
<b>Description</b>			
<p>In the past i used the template engine h2o. One thing about the For loop i liked was the special var {loop} which was available in For loop which contains some information about the loop like:</p> <ul style="list-style-type: none"><li>*first</li><li>*last</li><li>*odd</li><li>*even</li><li>*current</li><li>*length</li></ul> <p><a href="http://wiki.github.com/speedmax/h2o-php/built-in-tags">http://wiki.github.com/speedmax/h2o-php/built-in-tags</a></p> <p>i made some changes to the ForViewHelper which adds this behavior. Would be cool if you could integrate it.</p>

#### #3 - 2010-07-12 13:40 - Bastian Waidelich

- Status changed from New to Closed

Hi Marc and thanks for your feedback!

I copied the comment and patch to #6149

Closing this ticket to avoid duplication.
