<b>Subject:</b>	Failing unit test in DatabaseConnectionTest		
<b>Description</b>			
There is a check if positive 64bit integer values are supported by the system. As there isn't any check if the system is a 64bit system, this test fails for 32bit systems. As currently 32bit is mostly used on Windows systems (PHP x64 is still experimental) this issue is kind of Windows related.

[BUGFIX] Failing unit test in Dbal\DatabaseConnectionTest

There is one test to be sure 64bit integer values are stored correctly in the database. This test obviously has to fail on 32bit systems as they can't handle 64bit values. The patch disables the test for unsupported systems.

Releases: master, 6.2
