<b>Sprint Focus:</b>	On Location Sprint		
<b>Subject:</b>	Failing unit tests due to wrong path handling		
<b>Description</b>			
In the TYPO3\CMS\Fluid\Tests\Unit\View\StandaloneViewTest test case multiple tests fail on Windows systems because of wrong directory separator. Within the core classes unix like paths are used but tested against native Windows paths.

[BUGFIX] Failing unit tests due to wrong path handling

In some tests of the StandaloneViewTest case the configured expectations aren't met which results in failing tests on Windows systems. The mock is configured to return values when calling with given parameter. The parameter contains the path to a layout root. During runtime the used paths are converted to unix like paths but the tests are configured to expect Windows paths (forward slashes vs. backward slashes). This patch converts paths to unix like paths before the expectations are configured to not fail on Windows systems.

Releases: master, 6.2

Resolves: #64656
