Core - Bug # 64661

Bug # 40005 (Resolved): Several unit tests fail under Windows system

Status:	Resolved	**Priority:**	Should have
Author:	Nicole Cordes	**Category:**	FormEngine aka TCEforms
Created:	2015-01-30	**Assigned To:**	Nicole Cordes
Updated:	2015-01-30	**Due date:**	
TYPO3 Version:	6.2		
PHP Version:			
Complexity:			
Is Regression:	No		
Sprint Focus:	On Location Sprint		
Subject:	DateValidator fails to validate incorrect dates		
Description			

If the function strptime is not included in PHP (mostly only on Windows systems) the DateValidator fails to detect invalid dates.

Revision 091658d3 - 2015-01-30 20:02 - Nicole Cordes

[BUGFIX] DateValidator fails to validate incorrect dates

If the function "strptime" is not present in the environment (mostly on
Windows systems) the fallback to check a given date in the dateValidator
fails to detect invalid dates. The conversion from the given string to
a date object respects invalid dates and just converts them to valid
ones (by moving in next month/year). Therefore the function returns an
object instead of false. This patch adds a value comparison between old
and new value to be sure still the same date string is returned.

Releases: master, 6.2
Resolves: #64661
