TYPO3.Flow - Bug # 64970

Status:	Rejected	**Priority:**	Must have
Author:	Tobias Braumann	**Category:**	Validation
Created:	2015-02-10	**Assigned To:**	Bastian Waidelich
Updated:	2015-02-10	**Due date:**	
PHP Version:			
Has patch:	No		
Complexity:	no-brainer		
Affected Flow version:	Flow 2.0.0		
Subject:	empty email address should return false in EmailAddressValidator		
Description			
I expected that an empty email adress in EmailAddressValidator, would return false, but that will not be checked until now.

- Status changed from New to Rejected

- Assigned To set to Bastian Waidelich

Hey Tobias,

sorry for rejecting your ticket, but this is done on purpose, because it allows you to have **optional** properties that have to be a valid email address **if specified**. If you require a property, use the **NotEmpty** validator - and if it should be required **and** a valid email use both.

BTW: For custom validators you can manipulate this behavior via @acceptsEmptyValues (see

https://git.typo3.org/Packages/TYPO3.Flow.git/blob/HEAD:/Classes/TYPO3/Flow/Validation/Validator/AbstractValidator.php)

BTW2: This issue tracker is deprecated for Flow/Neos please use https://jira.typo3.org/ in the future
