Complexity:	
Subject:	Differentiate between NULL and empty array/SplObjectStorage

Description

When reconstituting objects we should only thaw array/SplObjectStorage if we had that when persisting and leave NULL in place otherwise.

Info: thawProperties() NULL check; signatures of mapArray(), mapSplObjectStorage(); collectProperties()

Revision 4499b4ba - 2010-06-21 17:30 - Karsten Dambekalns

[~TASK] FLOW3 (Persistence): When persisting NULL values are now recorded and collection (array, SplObjectStorage) properties are restored as NULL if they contained NULL, resolves #6520.
[~TASK] FLOW3 (Persistence): Equality comparison in a query now works correctly when comparing against NULL, relates to #8299.
[+API] FLOW3 (Persistence): Query::isEmpty() has been added and can check for empty collection properties, relates to #8299.
[~TASK] FLOW3 (Persistence): The like() constraint now can be used case-insensitive (like equals); constraints do stricter checks on property and operand types.
