<b>Subject:</b>	Move unused tt_content TCA fields and the arrangement to css_styled_content or compatibility6		
<b>Description</b>			
In "frontend" there is the field arrangement for each content element. Since the new strong default will not contain all content elements from css_styled_content anymore, and fields have been rearranged, the old fields and the arrangements need to move to css_styled_content or compatibility6. This will be replaced later on with the strong default settings.

[!!!][TASK] Isolate unused fields and field arrangements

In the upcoming strong defaults for "frontend" some fields and field arrangements are not in use anymore and belong to css\_styled\_content. Currently there are also some fields which are not used by css\_styled\_content. The field arrangements will also change.

This patch moves the fields and field arrangements to css\_styled\_content or compatibility6, depending on the current use. impexp and some of its functional tests have been adapted to cope with the moved fields.

#### Revision 326f6396 - 2015-04-13 12:13 - Patrick Broens

[TASK] Isolate content element previews for page module

With the new strong defaults some content elements have moved to the extensions mediace, css\_styled\_content and compatibility6.

The previews for the page module have not been moved.

This patch moves some previews to the corresponding extensions.
