Sprint:			
PHP Version:			
Has patch:			
Complexity:			
Subject:	Remove the privilege concept vom ACLs		

Description

ACL entries will simply define the access privilege by defining a GRANT or DENY for a resource. Example Policy.yaml entry:

acls:
  Speaker:
    UpdateOwnPaper: GRANT
    ownAccount: GRANT
    deleteAccount: DENY

The policy service should then provide two API methods: hasAccessOnJoinPoint() and hasAccessOnResource()
