

Core - Bug # 66046

Status:	Closed	Priority:	Must have
Author:	Daniel Wagner	Category:	Fluid
Created:	2015-03-26	Assigned To:	
Updated:	2015-03-26	Due date:	
TYPO3 Version:	6.2		
PHP Version:	5.3		
Complexity:			
Is Regression:	No		
Sprint Focus:			
Subject:	ViewHelper SelectView does not		
Description			
Problem			
TYPO3 6.2.11 together with powermail 2.2.0 produced following error with a simple select field in a form.			
No identifying value for object of class "" found.			
Analysis			
As far as I understood the code of SelectViewHelper from fluid the \$value should be added to \$options if it is an object or an array.			
If it is an object it has to be preprocessed. Actually above exception is thrown if it is an array instead of adding it to \$options.			
Suggestion			
<pre>protected function getOptions() { [...] \$optionsArgument = \$this->arguments['options']; foreach (\$optionsArgument as \$key => \$value) { - if (is_object(\$value)) is_array(\$value)) { + if (is_object(\$value)) { if (\$this->hasArgument('optionValueField')) { [...] } [...] - } - \$options[\$key] = \$value; + if (is_object(\$value)) is_array(\$value)) { + \$options[\$key] = \$value; + } } }</pre>
