

TYPO3.Flow - Bug # 6694

Status:	Resolved	Priority:	Could have
Author:	Thomas Fritz	Category:	Core
Created:	2010-03-04	Assigned To:	Karsten Dambekalns
Updated:	2010-10-20	Due date:	
PHP Version:			
Has patch:			
Complexity:			
Affected Flow version:			
Subject:	flow3 shell script uses non POSIX commands		
Description			
On line 36 (rev3903):			
<pre>FLOW3ROOTPATH="\$(dirname "\$(test -L "\$0" && readlink "\$0" echo "\$0")")"</pre>			
readlink is not POSIX compliant. So there is no guarantee that the shell script works on every Unixoid OS - for instance MAC, there is no readlink.			
A working solution for the above problem would be:			
<pre>#!/bin/bash # Path the script is called from. FLOW3_ORIGINALPATH="\$(pwd)" cd "\$(dirname \$0)" FLOW3_ROOTPATH="\$(pwd)" cd "\${FLOW3_ORIGINALPATH}"</pre>
