Subject:	Plugin templates are always loaded twice!?		
Description			
<p>Hello developers!</p> <p>I do not understand the following!</p> <p>In an installation with TYPO3 version 6.2.12, I import via the "ext_localconf.php" my extension a TS template which is a function of an installed extension.</p>			
<pre>if (\TYPO3\CMS\Core\Utility\ExtensionManagementUtility::isLoaded('indexed_search', \$exitOnError = FALSE)) { # Setup \TYPO3\CMS\Core\Utility\ExtensionManagementUtility::addTypoScript(\$_EXTKEY, 'setup','<INCLUDE_TYPOSCRIPT: source="FILE:EXT:blaaaaaa/Resources/Private/Extensions/indexed_search/Setup.ts">', defaultContentRendering);}</pre>			
<p>If I now in the "Template Analyzer" click on the "EXT css_styled_content/static/" and all the way down scroll - after css_styled template, the embedded TS-Template will appear twice in a row?</p> <p>And from the TYPO3 version 7.2.0 not only my TS-Template will appear twice in a row, but also all loaded System-Extension Templates!</p> <p>I have also checked in a basic installation with no additional configurations. See it in the supplied images.</p> <p>Is that normal?</p> <p>Thank you</p> <p>Harald</p>

Thanks for the report, I can confirm that extensions are shown twice. We have to investigate whether these are only shown twice, or if they are actually stored twice into the cache.
