

TYPO3.Flow - Bug # 6718

Status:	Resolved	Priority:	-- undefined --
Author:	Georg Ortner	Category:	Persistence
Created:	2010-03-06	Assigned To:	Karsten Dambekalns
Updated:	2010-10-20	Due date:	
PHP Version:			
Has patch:			
Complexity:			
Affected Flow version:			
Subject:	UnexpectedValueException thrown in file Session.php		
Description			
Object not found 6 SplObjectStorage::offsetGet(F3\Test\Domain\Model\Category_AOPProxy_Development) 5 F3\FLOW3\Persistence\Session::getIdentifierByObject(F3\Test\Domain\Model\Category_AOPProxy_Development) 4 F3\FLOW3\Persistence\Session::unregisterReconstitutedEntity(F3\Test\Domain\Model\Category_AOPProxy_Development) 3 F3\FLOW3\Persistence\PersistenceManager::persistAll() 2 F3\FLOW3\Core\Bootstrap::run() 1 require("/var/www/mydomain.dev/Packages/Framework/FLOW3/Scripts/FLOW3.php")			
This happens when the remove() Method of a repository is called. But still the Object is removed afterward.			
<pre>public function createAction() { \$object = \$this->objectManager->create("F3\Test\Domain\Model\Category"); \$this->categoryRepository->add(\$object); }</pre>			
<pre>public function removeAction(\F3\Test\Domain\Model\Category \$category) { \$this->categoryRepository->remove(\$category); }</pre>			
I'm using latest revision at this time and mysql as persistence backend.			

History

#1 - 2010-03-11 10:51 - Karsten Dambekalns

- Status changed from New to Accepted
- Assigned To set to Karsten Dambekalns

#2 - 2010-03-11 21:40 - Karsten Dambekalns

- Status changed from Accepted to Needs Feedback
- Target version set to 1.0 alpha 8

Please test with current SVN, this sounds familiar and should be fixed as of now.

#3 - 2010-03-12 10:53 - Georg Ortner

Thanks this seems to be fixed now, but there is something broken with the Session now.

```
Object "F3\FLOW3\Object\SessionRegistry" is not registered.  
5 F3\FLOW3\Object\Container\AbstractObjectContainer::get("F3\FLOW3\Object\SessionRegistry")  
4 call_user_func_array(array, array)  
3 F3\FLOW3\Object\ObjectManager::get("F3\FLOW3\Object\SessionRegistry")  
2 F3\FLOW3\Core\Bootstrap::run()  
1 require("/var/www/mydomain.dev/Packages/Framework/FLOW3/Scripts/FLOW3.php")
```

#4 - 2010-03-12 12:36 - Karsten Dambekalns

- *Status changed from Needs Feedback to Resolved*
- *% Done changed from 0 to 100*

Great to see that fixed. The SessionRegistry problem is known and will be fixed by middle of next week at the latest (but it's unrelated to this particular issue).
