Sprint Focus:					
Subject:	Resolve the conflict between Bootstrap 3 and PrototypeJS in Backend				
Description					
<p>I used the bootstrap dropdown button in my backend module and recognize a weird behavior. The button always disappear after clicking on it. After four hours trying to find a solution i found that the for that behavior relies on a conflict between bootstrap and PrototypeJS.</p> <p>[[http://www.softec.lu/site/DevelopersCorner/BootstrapPrototypeConflict]]</p> <p>The site describe the problem very well and offers two solutions. Please implement one of them. It seems to be that not only the dropdown function is affected.</p>
