Updated:	2010-10-20	**Due date:**	
Has patch:			
Affected Flow version:			
Subject:	If / For ViewHelper nesting issue		

Description

Hi,

I tried to implement this control structure in a Fluid section:

    ...

    <f:if condition="{datasheet.strUserLang} == ESPE">

        <p>Overall Project Data:</p>
        Excel 2007
        Excel 2003

        <p>country-specific project data:</p>

        <f:for each"{datasheet.arrProjLang}" as="foo"><p>Download your Excelsheets (2007/2003) for country {foo}:</p><a
href="{datasheet.dateipfad}_{foo}.xlsx">Excel 2007
Excel
2003
        </f:for>

     </f:if>

    ...

Fluid throws an error :

    Tx_Fluid_Core_Parser_Exception

    Templating tags not properly nested. Expected: Tx_Fluid_ViewHelpers_IfViewHelper; Actual:
    Tx_Fluid_ViewHelpers_ForViewHelper

Isn't it possible to nest if-constructs with for each - loops by now ?

History

#1 - 2010-03-09 12:09 - Frank Mey

plz delete this msg, stupid typo :S

#2 - 2010-03-09 12:10 - Frank Mey

- % Done changed from 0 to 100

#3 - 2010-03-09 12:47 - Bastian Waidelich

- Status changed from New to Closed

I guess, the problem was the missing "=" after "<f:for each"

But again, the exception is not very helpful here.. With #4704 that might change, cause the error message could highlight the erroneous lines of your template..
