The following works

```
$sshPort = $node->hasOption('port') ? '-p ' . escapeshellarg($node->getOption('port')) : "";
$scpPort = $node->hasOption('port') ? '-P ' . escapeshellarg($node->getOption('port')) : "";
$commands[] = "ssh {$sshPort} {$username}{$hostname} -C \"mkdir -p {$targetReleasePath}/Configuration/{$targetConfigurationPath}\"";
$commands[] = "scp {$scpPort} {$configuration} {$username}{$hostname}:{$targetReleasePath}/Configuration/{$targetConfigurationPath}/";
```
