PHP Version:			
Complexity:	medium		
Sprint Focus:			
Subject:	Add a "replace file" button when editing a file		
Description			
<p>This is a new feature request for a "replace file" button in TYPO3 7.4.</p> <p>I think this feature is a must have for many TYPO3 users, e.g. this "file replace" button existed in DAM and the editors want to replace a file on this way.</p> <p>Because there is a feature freeze for TYPO3 6.2 please add this feature in core in 7.4.</p> <p>This "replace file" button should only replace the existing file without replacing the name of the existing file (neither the filename nor the title or description).</p> <p>In media extension it does a good job.</p> <p>Please see https://forge.typo3.org/issues/56133 for a similar feature.</p> <p>Please comment if you also want this feature ;-).</p>
