Updated:	2015-07-09	Due date:	

TYPO3 Version:	7
PHP Version:	5.5
Complexity:	medium
Is Regression:	No
Sprint Focus:	

Subject:	tt_content categories field is not registered for all types

Description
Currently the tt_content table gets its categories field by the install tool configuration value: $GLOBALS['TYPO3_CONF_VARS']['SYS']['defaultCategorizedTables']   The problem here is that most of the content types are defined in Configuration/TCA/Overrides since #65922. Since the Overrides for the TCA are processed **after** the global categories are registered (in ExtensionManagementUtility::buildBaseTcaFromSingleFiles()), most of the content types are just left out when the CategoryRegistry calls ExtensionManagementUtility::addToAllTCAtypes().
