<b>PHP Version:</b>			
<b>Has patch:</b>			
<b>Complexity:</b>			
<b>Affected Flow version:</b>			
<b>Subject:</b>	The static object container is not rebuilt automatically if the FLOW3 revision changed		
<b>Description</b>			
If the FLOW3 revision changes, all caches are flushed. Because the static object container is no regular cache, it is missed and still used even if the FLOW3 revision changed. This can lead to fatal errors if classes have been deleted or otherwise modified.
