

Core - Bug # 68602

Status:	New	Priority:	Should have		
Author:	Morton Jonuschat	Category:	Import/Export (T3D)		
Created:	2015-07-29	Assigned To:	Morton Jonuschat		
Updated:	2015-08-03	Due date:			
TYPO3 Version:	7				
PHP Version:	5.6				
Complexity:					
Is Regression:	No				
Sprint Focus:					
Subject:	NULL values in records get transformed to FALSE on T3D import				
Description					
Given a database record with a NULL value in a column the export file generated will have a XML node like <field index="link" type="NULL"></field> - properly representing the NULL value. On Import the value gets transformed into a boolean somewhere during the import.

Wondering about this error. With #55082 this was normally fixed. And if you look at the assertion
importPagesAndRelatedTtContentWithDifferentImageToExistingData.csv you see that link is asserted NULL.

#2 - 2015-08-03 19:18 - Morton Jonuschat

If I understand this correctly then the test should fail even when not running in MySQL strict mode. The link field in sys_file_reference is defined as "NOT NULL" with a default of " (empty string). So the conversion of FALSE to " makes this test pass?
