Subject:	UI Prototype: Create an in-place editor for the TYPO3 v5 UI prototype		
Description			
<p>We want to create some dummy in-place editor for the TYPO3 v5 UI prototype, which should work as described by Jens on tr.im/t35ui.</p> <p>If you double click on an editable content element, an in-place editor should be created which can be used to adjust texts.</p>			

History

#1 - 2010-03-25 16:25 - Sebastian Kurfuerst

- File *TYPO3v5_BE_prototype-1.png* added
- Status changed from *New* to *Resolved*
- Assigned To set to *Sebastian Kurfuerst*
- Priority changed from *Should have* to *Must have*
- % Done changed from *0* to *100*

After a double-click on a content area, you see that a text editor pops up (see first screenshot).

The data is then sent via ext direct to the server, which will store the data then.

Thanks to Nils Dehl and Christopher Hlubek for fixing this bug together with me :-)

This bug has been fixed in the bug auction at T3BOARD10.

Greetings,
Sebastian
