

## TYPO3.Flow - Bug # 7199

<b>Status:</b>	Resolved	<b>Priority:</b>	Should have
<b>Author:</b>	Robert Lemke	<b>Category:</b>	Persistence
<b>Created:</b>	2010-04-09	<b>Assigned To:</b>	Robert Lemke
<b>Updated:</b>	2010-10-20	<b>Due date:</b>	
<b>PHP Version:</b>			
<b>Has patch:</b>			
<b>Complexity:</b>			
<b>Affected Flow version:</b>			
<b>Subject:</b>	Persistence Manager retrieves repository objects by class name instead of object name		
<b>Description</b>			
The persistence manager uses the class name as an argument to the Object Manager's get() method. This usually works - until the object name and the class name are different. This seldomly happens but it could.			

### Associated revisions

Revision 7d6cb980 - 2010-04-09 17:39 - Robert Lemke

[+TASK] FLOW3 (Object): The Abstract Object Container now gives a hint / throws an InvalidArgumentException if object names or class names were specified with a leading backslash. Relates to #7198

[+BUGFIX] FLOW3 (Reflection): The Reflection Service now ignores leading backslashes in class names specified in annotations. Resolves #7198

[+BUGFIX] FLOW3 (Persistence): The Persistence Manager now retrieves repository objects by object name instead of class name. Resolves #7199
