PHP Version:			
Has patch:			
Complexity:			
Subject:	Custom CLI Controller without Modification of flow3.sh		
Description			
<p>I'm currently putting an Doctrine2 Package together and wanted to add the Doctrine2 schema-tools to the flow3 cli script.</p> <p>Wouldn't it make sense to make cli controllers dynamically accessible through the flow3 script without modification to it?</p> <p>the attached diff is a simple example to achieve something like this</p>

Hi Marc,
we're thinking about making all actions accessible through a central CLI. See #4426 for details.

#3 - 2010-08-18 15:13 - Karsten Dambekalns

- Category set to Core
- Status changed from Needs Feedback to Closed

Closing this in favour of #4426.
