| <b>PHP Version:</b>   |   |                     |              |
| <b>Has patch:</b>   |   |                     |              |
| <b>Complexity:</b>  |   |                     |              |
| <b>Affected Flow version:</b>   |   |                     |              |
| <b>Subject:</b>   | Undefined FLOW3 root path does not issue an error in CLI mode |                     |              |
| <b>Description</b>  |   |                     |              |
| <p>When FLOW3 is run in CLI context, the environment variable FLOW3_ROOTPATH must be set. If this is not the case, FLOW3 will behave unexpectedly.</p> <p>However, currently the safeguard for assuring that FLOW3_ROOTPATH is set, is broken. See FLOW3's Bootstrap.php.</p> |   |                     |              |
