TYPO3.Fluid - Bug # 7292

Status:	Resolved	**Priority:**	Must have
Author:	Sebastian Kurfuerst	**Category:**	ViewHelpers
Created:	2010-04-16	**Assigned To:**	Sebastian Kurfuerst
Updated:	2010-10-20	**Due date:**	
Has patch:			
Affected Flow version:			
Subject:	escapeViewHelper does not take encoding of resulting web page into account		
Description			

Uf I use {user.name} and username as a special char, nothing is displayed.
if I use <f:escape value="{user.name}" encoding="iso-8859-1"></f:escape>, it
works.

Solution: use the same encoding TYPO3 uses for displaying the page, as we assume that data rendered has the same encoding as well.
