Well, well... please take a minute to check my changes and have a look at the CGL and the existing code! Really, tiny stuff matters as much as the big chunks.

About the tests:

- Is it really clever to check for the ids of the automatically generated ExtJS stuff? I am no expert, but I would fear this to be unstable...
- The test loginWithCorrectCredentialsWorks checks for the presence of "Wrong username or password", which seems wrong.

As soon as possible we'll try to run this on the test system.

do not use the extjs IDs for the tests, they can change from rendering to rendering
