

TYPO3.Fluid - Bug # 7417

Status:	Resolved	Priority:	Must have
Author:	Felix Oertel	Category:	Core
Created:	2010-04-22	Assigned To:	
Updated:	2010-10-20	Due date:	
Has patch:			
Affected Flow version:			
Subject:	Misleading exception on wrong data type		
Description			
<p>hi,</p> <p>in a viewhelper I annotated an argument "array" but throw in an object. The misleading exception @@ was thrown.</p> <p>In Core/ViewHelper/AbstractViewHelper.php:295 validateArguments() tries to throw a "wrong type"-exception but generates a new exception itself by calling strval(\$this->arguments[\$argumentName]).</p> <p>We should only output the argument's value if it's a human readable type though skipping objects and arrays.</p>

```
hi,  
  
in a viewhelper I annotated an argument "array" but throw in an object. The misleading exception  
@@  
was thrown.  
  
In Core/ViewHelper/AbstractViewHelper.php:295 validateArguments() tries to throw a "wrong type"-exception but generates a new exception  
itself by calling strval($this->arguments[$argumentName]).  
  
We should only output the argument's value if it's a human readable type though skipping objects and arrays.
```

Attached patch (against FLOW3 SVN) removes the "Value of argument:" sentence completely and strval is not called.
