| <b>Subject:</b>  | Implement a generic configuration container available in JavaScript |                     |                      |
| <b>Description</b>   |   |                     |                      |
| <p>We need to transfer some configuration data from PHP to JavaScript, like URLs which should be called, and the like.</p> <p>After discussion with Nils, we came up with the following proposal:<br/>The JS configuration should be found at<br/>F3.TYPO3.Config.[Modulename].[module specific configuration], so for login, it could be:<br/>F3:TYPO3.Config.Login.authenticationControllerUri</p> <p>This needs to be built on the server side.</p> |   |                     |                      |
