Wireframes are showing the needed values.

Design will be designed within the Design Sprint Phase later on.

This should be fully skinnable with custom Error Icons for custom Error Messages.

Those Erros should look somehow a bit like the 4.x once.

I like to get there more consistence over the brand version.

So ONLY for a better understand here the upcoming 4.4 error screen designs.

This will (for sure) look a bit different at 5.0. But this need to defined in a bigger scope when the Design Sprint is going.
