TYPO3.Flow - Bug # 7727

Status:	Resolved	**Priority:**	Should have
Author:	Soren Malling	**Category:**	Core
Created:	2010-05-09	**Assigned To:**	Robert Lemke
Updated:	2011-07-06	**Due date:**	

PHP Version:	
Has patch:	
Complexity:	
Affected Flow version:	
Subject:	Better handling of "wrong" parameters in ./flow3

Description

Just did a fresh "svn export ..." and tried to list the available packages

> TurtleJoe:flow3 sorenmalling$ ./flow3 package list avaliable
>
> Uncaught Exception in FLOW3 #1186669086: An action "listavaliableAction" does not exist in controller
> "F3\FLOW3\Package\Controller\PackageManagerController".
> thrown in file Packages/Framework/FLOW3/Classes/MVC/Controller/ActionController.php
> in line 148

Due to a spelling error i get this ugly error message. I think there should be a better handling of such errors, when FLOW3 goes in to beta/RC mode

History

#1 - 2011-04-01 16:39 - Karsten Dambekalns

- Category changed from - Error Handler Report - to Core

Meanwhile this has changed and one gets no output at all: karsten@kmac:typo3v5 (master)$ ./flow3 do.shit
> karsten@kmac:typo3v5 (master)$ ./flow3 flow3:core:foo
> karsten@kmac:typo3v5 (master)$

Exceptions are only shown in the log. When running flow3_dev things are almost as bad as before: karsten@kmac:typo3v5 (master)$
> ./flow3_dev do.shit
>
> Uncaught Exception in FLOW3 #1264589155: Object "" is not registered.
> thrown in file Packages/Framework/FLOW3/Classes/Object/ObjectManager.php
> in line 167
>
> karsten@kmac:typo3v5 (master)$ ./flow3_dev flow3:core:foo
>
> Uncaught Exception in FLOW3 #1300902143: A command method "fooCommand()" does not exist in controller
> "F3\FLOW3\Command\CoreCommandController".
> thrown in file Packages/Framework/FLOW3/Classes/MVC/Controller/CommandController.php
> in line 99

#2 - 2011-07-06 16:36 - Karsten Dambekalns

- Status changed from New to Resolved

- Assigned To set to Robert Lemke

- Target version set to 1.0 beta 1

- % Done changed from 0 to 100

Now it outputs the help instead.
