Subject:	IRRE: Header and fields of a child record do not seem to belong together visually		
Description			
Problem: Header and fields of a child record do not seem to belong together visually. Something like a border around the header and fields section of each child record is missing.			
Solution: Add a border around an IRRE section to visualize that the fields below belong to a parent record.			
Current situation: http://bugs.typo3.org/file_download.php?file_id=4706&#38;type=bug			
Desired situation: http://bugs.typo3.org/file_download.php?file_id=4708&#38;type=bug

here is my proposal

http://bugs.typo3.org/file_download.php?file_id=5096&type=bug

a) darker background for the IRRE-childs to have it clear as different section

b) make complete section collapsable and shows count of childs

darker background: could be any different background

as olly mentioned in bugtracker <http://bugs.typo3.org/view.php?id=8267>

To be consequent with the collapsable section/icon, also the header of each child record would require such icon. Also the count of items is a nice idea. However there are some (technical) side-effects:

- plural of object, e.g. "prices", "offers" is not possible or you have to define the plural for each object name - adding only an "s" for English Plural would not work in all cases - in German its more difficult, e.g. for "Preise" or "Hotels" -> so we just use "items" or "item"
- each dynamic action (e.g. localizing/synchronizing) records has to take care about this correct count
- notification of unfilled required fields has to be taken into account for the collapsable section

I think there is a lot of potential in it.

- the plural problem could be simplified with using record/records

- record count can be complex, but could be a tooltip, where you show complete number, and on hover there is details shown like
flag default - 12
flag de - 8
etc.
- notification can be done with the notification-icon, should be no problem to integrate it in the header

and yes, i would prefer the +/- icon for each header (groups and elements)
