Updated:	2011-05-05	Due date:	
Subject:	As a User I want to see a dynamic navigation on the website		
Description	<ul style="list-style-type: none">- There should be a pagetree in the Content Repository with at least 1 Level- It should be rendered with TypoScript as ul / li based navigation. It should render as Folddown menu (CSS or JS)- The Menu Generation (TMENU?) should be documented, with features like:<ul style="list-style-type: none">- entryLevel- different Rendering of the different Levels (wrap, classes)- different Rendering of different States (normal, active (=page in menu = current page), current (=page in menu is in rootline of current page))		
Related issues:	related to TYPO3.Neos - Task # 8442: Fluid ViewHelper <f:render> should suppo... Resolved 2010-06-22
