Updated:	2010-10-20	Due date:	
PHP Version:			
Has patch:			
Complexity:			
Subject:	API for accessing persisted resources		
Description			
<p>Currently there is no clean way to retrieve a resource object representing a persisted resource. The only way to use persisted resource right now is Fluid's resource view helper - but this doesn't help if you want to access resources directly via PHP's file functions.</p>			

Associated revisions

Revision 00e63862 - 2010-06-07 14:54 - Robert Lemke

[+FEATURE] FLOW3 (Resource): The resource:// stream wrapper now also supports persistent resource - just specify the resource hash to access one. Resolves #8082

[+FEATURE] FLOW3 (Resource): The Resource Manager now provides an API method for getting more information about recently imported or uploaded resources. Resolves #8088

[+FEATURE] FLOW3 (Resource): Resource objects can now be converted to a string. Its __toString() method returns the resource's sha1 hash.

[+TASK] FLOW3 (Documentation): Updated the Resource Management section in the FLOW3 manual.

[~TASK] FLOW3 (Error): The debugger now doesn't filter Resource classes anymore.
