

TYPO3.Kickstart - Bug # 8177

Status:	Resolved	Priority:	Must have
Author:	Patrick Kollodzik	Category:	
Created:	2010-06-11	Assigned To:	
Updated:	2010-10-20	Due date:	
Affected Flow version:			
Subject:	Wrong Template name		
Description			
Using FLOW3 Alpha 9			
./flow3 kickstart package DummyPackage			
The filename of the index template for the StandardController is in lowercase, wich will result in a 404 error.			
If you follow the documentation "Getting Started" the example in chapter 6.2 will not work.

The filename of the index template for the StandardController is in lowercase, wich will result in a 404 error.

If you follow the documentation "Getting Started" the example in chapter 6.2 will not work.

Just to have this searchable (cost me last night because it wasn't): in case the uppercase view filename is missing, you get the 404 page telling this:

Sorry, the page you requested was not found.

The technical reason is: No template was found. View could not be resolved for action "index".

#3 - 2010-06-17 13:02 - Bastian Waidelich

- File 8177_v1.patch added

Attached is a patch that should resolve this issue.

Please apply and commit asap, IMO this is a big blocker for a lot of "getting started"-people

Please note, that you'll probably have to rename viewTemplate.html.tpl to ViewTemplate.html.tpl in Resources/Private/Generator/View/ as SVN can't handle this..

#5 - 2010-06-17 13:12 - Bastian Waidelich

- File 8177_v2.patch added

Ok, another version without the ViewTemplate.html.tpl renaming. Just don't forget to rename it manually.

Of course it can, you just need a case-sensitive file system to do it. And a reasonable client (like the CLI). Hah.

#7 - 2010-06-18 12:00 - Karsten Dambekalns

- Status changed from New to Resolved

- % Done changed from 0 to 100

Applied in changeset r4598.
