Subject:	Add ViewInterface to ViewHelperVariableContainer again		
Description			
<p>With r4273 all view typehints have been replaced by an "object" annotation. Robert can't remember the exact reason. I'd suggest to revert this change and see, whether the unit tests still run. I think, it's really important to work with an interface rather than object</p>

Revision 5e628526 - 2010-07-12 21:49 - Sebastian Kurfuerst

[+BUGFIX] Fluid (Core): Added AbstractTemplateView Type Hints to ViewHelperVariableContainer again. Resolves #8319.

[+BUGFIX] Fluid (Core): Renamed F3\Fluid\Core\Parser\SyntaxTree\ViewHelperNode::getViewHelper() to F3\Fluid\Core\Parser\SyntaxTree\ViewHelperNode::getUninitializedViewHelper()

[+TASK] Fluid (Core): Cleanup: Removed F3\Fluid\Core\Parser\TemplateParser::getConfiguration(), as it is never used.

[+TASK] Fluid (Core): Added two more backporter tokens to ease the synchronization with v4.

+1, we should get rid of this @param object; in both branches. I'll try to use AbstractTemplateView here, I think this should be enough

#4 - 2010-07-12 20:37 - Sebastian Kurfuerst

OK; I am now using F3\Fluid\View\AbstractTemplateView in the type hint, and tested the following things:

- Fluid Viewhelpertest
- Phoenix Page Rendering (so Fluid is invoked from TypoScript)
- Unit Tests

and they all work, so I think that type hint should be fine. I'll commit it right away.
