TYPO3.Flow - Feature # 84

Status:	Closed	**Priority:**	Should have
Author:	Malte Jansen	**Category:**	Object
Created:	2007-12-21	**Assigned To:**	Robert Lemke
Updated:	2010-10-20	**Due date:**	

PHP Version:	
Has patch:	
Complexity:	
Subject:	ComponentManager should not manage abstract classes

Description

Abstract classes can not run standalone. So they should not be managed by the Component Manager and should not be available as components.

History

#1 - 2008-01-13 12:31 - Malte Jansen

Some how on linux the CM does not load abstract-files and on windows it loads the abstract-files.

On windows there is no error...

On Linux we got an error (something like: Component "T3_Framework_MVC_View_Abstract" not found)

You can reproduce this Error with following lines in the Components.conf:

    [T3_Framework_MVC_View_Abstract]
    constructorArguments.1.reference = T3_Framework_Component_Manager

Both installations have the latest Version of T3 5.0.

Timmy can confirm this behavior

By the way:
This error is not catched by an exception!

#2 - 2008-01-13 17:04 - Robert Lemke
- *Status changed from New to Closed*
- *Sprint set to fixed*

(In r416)
  - Framework: (Validation) Fixed class name of T3_Framework_Validation_Exception_InvalidSubject (incomplete refactoring)
  - Framework: Abstract class cannot and are not longer registered as components. Fixes #84.
