Problem occurs if you have Partials in your templates, for example:

> <f:render partial="PartialName" />

If fluid template files do not contain partials to render, problem does not appear.

- Project changed from TYPO3.Flow to TYPO3.Fluid

Hey,

can you upload your template please? Here, everything seems to work with the exact same setup.

Greets,

Sebastian

Hmmm... we are unable to reproduce this issue again. In (newer) FLOW3/Fluid versions, Partials are working. Also tested with FLOW3-1.0.0-alpha10 package.

I am happy to suspend this ticket or close it as "not reproducible".
