

## TinyMCE RTE - Bug # 8542

<b>Status:</b>	Closed	<b>Priority:</b>	Should have
<b>Author:</b>	Georg Ringer	<b>Category:</b>	
<b>Created:</b>	2010-06-29	<b>Assigned To:</b>	
<b>Updated:</b>	2012-01-26	<b>Due date:</b>	
<b>Subject:</b>	default linkhandler produces error		
<b>Description</b>			
<p>If using the full.ts example, a linkhandler for tt_news is used. There are quite a few installations which don't use tt_news - therefore the example shouldn't be enabled as default.</p> <p>Some possible solutions:</p> <ul style="list-style-type: none"><li>a) Disable the default example</li><li>b) Check if \$GLOBALS['TCA'][\$tableName] exists</li><li>c) Check with a query if the table exists.</li></ul> <p>I am for option b</p>			

### History

#### #1 - 2010-07-16 13:25 - Thomas Allmer

- Status changed from New to Needs Feedback

I just tried that and there seems to be a problem with the "loading" order... so if you install tiny\_mce\_rte and then tt\_news it won't work... the other way around is fine

I tried this with a simple

```
if( $TCA['tt_news'] ) {  
    //...  
}
```

in ext\_tables.php

if you have a solution for that I would certainly integrate it...

#### #2 - 2011-07-09 16:48 - Marcus Schwemer

- File 8542\_v01.diff added

- Status changed from Needs Feedback to Resolved

The linkhandler now checks whether a table exists in TCA. If not, it skips creating links. This catches not only the default config for tt\_news, but also uninstalled extensions (even if the tables still exist).

Patch attached.

Kind regards,

2015-08-04

Marcus

You can find the current version also on my github: [https://github.com/mschwemer/TYP03-tinymce\\_rte](https://github.com/mschwemer/TYP03-tinymce_rte)
