

TYPO3.Flow - Bug # 8554

Status:	Resolved	Priority:	Must have
Author:	Bastian Waidelich	Category:	AOP
Created:	2010-06-29	Assigned To:	Karsten Dambekalns
Updated:	2010-10-20	Due date:	
PHP Version:			
Has patch:			
Complexity:			
Affected Flow version:			
Subject:	AOP interceptor removes default value from method argument		
Description			
When activating an AOP interceptor for a method			
<pre>public function indexAction(array \$someArray = array)</pre>			
I'm receiving following runtime notice:			
Declaration of F3\Viewhelpertest\Controller\StandardController_AOPProxy_Development::indexAction() should be compatible with that of F3\Viewhelpertest\Controller\StandardController::indexAction()			
The reason is, that in the AOP proxy class the declaration looks like			
<pre>public function indexAction(array \$someArray)</pre>

Well, default values are put into proxy classes, just not for default values that are of type array... :)
