

TYPO3.TypoScript - Bug # 8646

Status:	Closed	Priority:	Must have
Author:	Bastian Waidelich	Category:	_old
Created:	2010-07-04	Assigned To:	Karsten Dambekalns
Updated:	2012-07-13	Due date:	
Subject:	CropProcessor should respect pre/suffix string in calculation of maximum characters		
Description	Right now the Crop TypoScript processor adds the configured pre/suffix string to the cropped string resulting in a string that exceeds the maximumCharacter setting. Instead it should subtract the length of the pre/suffix string from maximumCharacters as it happens in the v4 crop function

Is it subtracted anywhere in v4? Had a look at t3lib/class.t3lib_cs.php (crop) and typo3/sysex/cms/tslib/class.tslib_content.php (crop) which don't take that length into account. The latter is what is used by the fluid-cropviewhelper for v4.

#3 - 2011-11-07 11:38 - Sebastian Kurfuerst

- Project changed from TYPO3.Neos to TYPO3.TypoScript
- Category deleted (TypoScript)

#4 - 2012-07-04 11:25 - Sebastian Kurfuerst

- Category set to _old

#5 - 2012-07-13 16:20 - Karsten Dambekalns

- Assigned To set to Karsten Dambekalns

#6 - 2012-07-13 16:21 - Karsten Dambekalns

- Status changed from New to Closed
