I would like to work on the management view tasks, so this one, but this here is not totally clear to me.

#4 - 2010-07-07 09:02 - Sebastian Kurfuerst

Let me explain this a bit more in detail:

The first part of creating the Management View is that inside the Content Area, the area needs to be splitted into two parts: On the left side, there should be the tree, and on the right side, there should be the Grid displaying the records.

And now, the first step to make this stuff happen is creating a BorderLayout inside the Content Area: In the left area should be the tree, and on the right side the grid.

Hope this is more understandable now :-)

Greets,
Sebastian

See also Scrum protocol of today. More or less finished, I am polishing it to put out a first patch.

- File *phoenix_task_8700.patch* added

First patch to try. Tree and Grid component are prepared but do not much yet (they need data stores of course). One big thing I was not able to solve. If you access the Management Tab you won't see much change after applying the patch but if you use firebug you will see that indeed the management layout with tree and grid is rendered but the div with id "F3-TYPO3-Management-ManagementView" has class "x-hide-display" which hides it. Removing that class displays everything, but I have not found out how to tell ExtJS to not do that.

Hey,

thanks for your patch! I think you have to change the layout inside F3.TYPO3.UserInterface.ContentArea from card to fit -- it was still some kind of relict that broke the behavior there.

Hopefully this fixes the first problem :-). Now, however, the black bar on top is missing for me inside the management view (see attached screenshot); and I don't know yet why...

Hopefully this already helps you a little bit!

Thanks for your efforts :-)

Greets,
Sebastian
