TYPO3.Fluid - Task # 8732

Status:	Resolved	**Priority:**	Should have
Author:	Michael Feinbier	**Category:**	ViewHelpers
Created:	2010-07-08	**Assigned To:**	Bastian Waidelich
Updated:	2010-10-20	**Due date:**	
Has patch:			
Subject:	Small improvement of ForViewHelper		
Description			

In the Tx_Fluid_ViewHelpers_ForViewHelper there's a method convertToArray() which extracts an array from the traversable object via foreach.
This should be replaced by the function iterator_to_array() which does basically the same but more performant on huge objects than foreach'ing manually.

Patches for v4 and v5 branch are attached.

Associated revisions

Revision bc55efa4 - 2010-07-22 16:45 - Bastian Waidelich

[~TASK] Fluid (ViewHelpers): Replaced custom convertToArray() method by PHPs iterator_to_array() function in cycle, for and groupedFor ViewHelpers. This resolves #8732. Thanks to Michael Feinbier!

Revision 7feab9f3 - 2010-07-26 17:08 - Bastian Waidelich

[+TASK] Fluid (ViewHelpers): Small performance improvement in ForViewHelper: Objects will only be converted to arrays if reverse is TRUE. Relates to #8732
[+TASK] Fluid (View): Added getter for template parser to AbstractTemplateView. This is useful if you want to use the parser from within your custom ViewHelper (creating a new instance would skip interceptor registration)

- *Status changed from New to Accepted*

That's great, I didn't know that function. Thanks!

#2 - 2010-07-22 16:44 - Bastian Waidelich

- *Tracker changed from Bug to Task*

#3 - 2010-07-22 16:50 - Bastian Waidelich

- *Status changed from Accepted to Resolved*
- *% Done changed from 0 to 100*

Applied in changeset r4898.
