| Subject: | Create a new tree based breadcrumb menu component | | |
| Description | <p>Create a new breadcrumb menu component based on a Ext.tree.TreePanel.</p> <p>Behaviour see TYPO3 5.0 Experience Concept Presentation starting with slide 150.</p> <p>The tree data structure allows us to have hierarchical menus. Add and remove childnodes or dynamical reload them.</p> <p>technical todos:</p> <ul style="list-style-type: none">- Create a abstract breadcrumb menu component based on Ext.tree.TreePanel- Creat a NodeUi class which render the tree horizontal- add the animations and behaviour jens described in the slides. <p>Additionally, see the JavaScript class F3.TYPO3.UserInterface.BreadcrumbMenu for the (currently quite hacky) implementation, which needs to be refactored.</p> | | |

I'm working on this one...

#2 - 2010-07-08 16:57 - Sebastian Kurfuerst

- Status changed from New to Accepted

#3 - 2010-07-14 10:00 - Sebastian Kurfuerst

Hey Rens,

I just wanted to ask what the current status on this issue is. Do you have any open questions, or is there anything we can do to support you solving this issue? You'll find us in the usual Jabber chatroom.

Thanks in advance for a short status!

Greets,
Sebastian

#4 - 2010-07-19 21:32 - Sebastian Kurfuerst

- Assigned To set to Rens Admiraal

#5 - 2010-07-20 08:12 - Rens Admiraal

Hi Sebastian,

My time has been stuffed with a deadline for work... Will be working on this one tonight.

Status:

Menu is horizontal, some styling has still to be done, and the effects have to be added. Maybe we can chat a bit about the effects today / this evening?
Will get online on jabber also...

Greetz

#6 - 2010-07-20 09:20 - Sebastian Kurfuerst

Great! I'll have time until 15:00 today, after that I won't be online anymore.

Greetings,
Sebastian

- File *tmp.html* added

Hey,

I have been trying to fix the issue with the horizontal slide-in. So far, I have been mostly able to isolate the issue -- see the attached "tmp.html" file for a test.

The problem is that the `el.slideIn()` function cannot work with inline elements, as it seems.

That's why I have tried out something else: Make all the elements Block Elements, and make them float to the left. Then, just animate the width of the element. This works, but then one needs the target size of the element. However, as only the icons should be slid out at the current point, this should be pretty easy to calculate. If we need to slide out text, we could use `Ext.util.TextMetrics.measure()` to measure the size of the text.

Hope this already helps,
Sebastian

#8 - 2010-07-25 11:40 - Rens Admiraal

Hi Sebastian: it worked ;-)

Needs some finetuning for 2nd and higher levels, but will be working on this today. I wasn't sure if it was a good thing to use the Git repository for the standalone menu, so I created my own repo for this one: <http://github.com/radmiraal/Horizontal-ExtJS-Menu>

#9 - 2010-07-25 11:44 - Sebastian Kurfuerst

Hey Rens,

really cool; that looks already really promising!

If you need any more help, let me know :-)

Looking forward to the results,
Sebastian

#10 - 2010-08-20 12:56 - Karsten Dambekalns

- Target version changed from 593 to 628

#11 - 2010-08-27 11:08 - Robert Lemke

- Subject changed from *Create a new tree based rootlinemenu component* to *Create a new tree based breadcrumb menu component*

#12 - 2010-10-16 10:44 - Sebastian Kurfuerst

- Status changed from *Accepted* to *Resolved*

- % Done changed from 0 to 100

this has been done, that's why I close that issue.

#13 - 2011-05-05 13:49 - Robert Lemke

- Project changed from *Core Team* to *Base Distribution*

- Category deleted (*JavaScript*)

- Target version deleted (*628*)

#14 - 2012-08-31 10:38 - Robert Lemke

- Project changed from *Base Distribution* to *TYPO3.Neos*
