TYPO3.Flow - Bug # 879

Status:	Closed	**Priority:**	Could have
Author:	Robert Lemke	**Category:**	MVC
Created:	2008-06-26	**Assigned To:**	Andreas Förthner
Updated:	2010-10-20	**Due date:**	
PHP Version:			
Has patch:			
Complexity:			
Affected Flow version:			
Subject:	setValidator et al. are misleading method names		
Description			

Method names such "setValidator" imply that the expected argument actually is a validator object. However in F3_FLOW3_MVC_Controller_Argument the expected argument is a class name.

Either rename the method to setNewValidator or change the method signature.

There are also a lot of tests missing for new methods introduced to F3_FLOW3_MVC_Controller_Argument.
