Updated:	2010-10-20	Due date:	
PHP Version:			
Has patch:			
Complexity:			
Subject:	Add forwarding support to MVC controller		
Description			
Add forwarding support to MVC controller ... something like <code>\$this->forward(\$controllerName, \$actionName)</code> and other features.			

Associated revisions

Revision a0862d02 - 2008-08-04 14:40 - Robert Lemke

- FLOW3: (MVC) Renamed the Default Controller. Addresses #474
- FLOW3: (MVC) Implemented the dispatch loop: The request object now contains a flag which tells if the dispatcher needs to dispatch the request again because it contains new information about the responsible controller.
- FLOW3: (MVC) The Request object now works differently in terms of specifying the controller: Instead of passing the controller component name, it is now specified by setting the package key and controller name. Addresses #474
- FLOW3: (MVC) Implemented support for forwarding requests (see Request Handling Controller). Resolves #88 and resolves #215.
- FLOW3: (MVC) Removed the locking feature from the Request object - otherwise forwarding would not be possible.
- FLOW3: (MVC) Refactored most of the controller-related tests and fixtures.
- FLOW3: Adapted the standard routes
- FLOW3 + TYPO3: Updated the Package Meta information

History

#1 - 2008-01-28 15:56 - Robert Lemke

- Target version changed from 1 to 18

#2 - 2008-07-01 15:32 - Robert Lemke

- Target version deleted (18)

#3 - 2008-08-04 14:43 - Robert Lemke

- Status changed from New to Resolved
- % Done changed from 0 to 100

Applied in changeset r1070.
