

TYPO3.Flow - Task # 8835

| | | | |
|---|---|---------------------|--------------------|
| Status: | Resolved | Priority: | Should have |
| Author: | Bastian Waidelich | Category: | |
| Created: | 2010-07-13 | Assigned To: | Karsten Dambekalns |
| Updated: | 2010-10-20 | Due date: | |
| Sprint: | | | |
| PHP Version: | | | |
| Has patch: | | | |
| Complexity: | | | |
| Subject: | Remove @version annotation from FLOW3 classes | | |
| Description | | | |
| Currently each PHP class contains the following line | | | |
| * @version \$Id: \$ | | | |
| That is replaced by SVN clients (if configured correctly) before committing. | | | |
| With the move to Git that won't be the case any longer, so we should get rid of these annotations. | | | |
| AFAIK there is no corresponding feature in Git, but IMO we don't need the revision in the file or have any of you ever counted on the @version annotation? Besides, it makes backporting a very tedious job. | | | |
| Note: If we decide to remove this annotation, we'll have to adjust the CGL document on http://flow3.typo3.org/documentation/coding-guidelines/ too | | | |

Revision 053748bc - 2010-08-23 16:06 - Karsten Dambekalns

[-TASK] FLOW3: Removed @version keyword from files, resolves #8835.

Change-Id: Ic27d691b7fdb82d9646ecd7c84b3759644b448f5

History

#1 - 2010-07-13 12:25 - Manuel Strausz

A related issue seems to be the \$Revision keyword expansion, which is set in the Bootstrap:

```
/**
 * FLOW3's Subversion revision
 */
```

```
const REVISION = '$Revision: 4443 $';
```

I only saw this in use for the Configurations-Cache include (e.g. in 'Configurations/Production/ProductionConfigurations.php'), where it is used to make sure no obsolete cache is loaded when the framework revision changed, so this would have to be solved in a different way.

Good catch! We'll have to find a new mechanism for that.

#3 - 2010-07-15 11:03 - Karsten Dambekalns

- Status changed from New to Accepted
- Assigned To set to Karsten Dambekalns
- Target version set to 1.0 alpha 11

Assigning this to me, as it needs to be done with the Git move anyway... :)

#4 - 2010-08-12 22:42 - Karsten Dambekalns

Some helper, for the record:

```
find ./ -name '*.php' -exec perl -i.bak -ne 'print unless /^@version/' {} \;
```

#5 - 2010-08-13 17:30 - Karsten Dambekalns

- Status changed from Accepted to Resolved
- % Done changed from 0 to 100

Applied in changeset r4969.
