Subject:	Only focus the username field if it has not been focused already		

Description

Since r4774 we have a nice autofocus feature in the TYPO3 login form.

I noticed one issue though:

If the page still loads while you're already typing the password, the focus will switch to the username field..

You can reproduce this by clearing your browser cache, calling http://latest.phoenix.demo.typo3.org/typo3/login and typing in the password field.

Maybe it already helps to move the JS to the top of the page.

- Assigned To changed from Berit Hlubek to Bastian Waidelich

I changed the JS and moved it a bit to the top.

As I couldn't reproduce the problem on my notebook I created a patch with the different JS, perhaps you could test whether the problem still exists in that version?

Could you please upload the patch? ;)

Best,

Bastian

#3 - 2010-08-17 15:19 - Berit Hlubek

- File LoginFocus.patch added

#4 - 2010-08-17 16:09 - Berit Hlubek

- File LoginFocus.patch added

I added another version, like we discussed it would be nicer to just set the focus via JS if nothing already is on focus.

#5 - 2010-08-17 20:06 - Berit Hlubek

Committed this version to enable testing.

#6 - 2010-08-18 01:33 - Bastian Waidelich

- Status changed from New to Resolved

Great, that fixed the issue for me.

Thanks, Berit!
