

TYPO3.Fluid - Bug # 8854

Task # 26664 (New): Clean up Form ViewHelpers

Task # 26658 (New): Make Form ViewHelpers consistent

Status:	Resolved	Priority:	Must have
Author:	Bastian Waidelich	Category:	ViewHelpers
Created:	2010-07-14	Assigned To:	Bastian Waidelich
Updated:	2012-01-20	Due date:	
Has patch:	No		
Affected Flow version:	Git master		
Subject:	form.checkbox ViewHelper throws Exception in newAction		
Description	<p>When using the form.checkbox ViewHelper in ObjectAccessorMode (bound to a property of the form object) this leads to an error when the form object is NULL (e.g. in the newAction) because the type of the property (array / boolean) can't be determined. To avoid this issue, we need a new argument "multiple" that will make sure, that "[]" are appended to the checkbox field name.</p>

[BUGFIX] form.checkbox ViewHelper throws Exception in newAction

This adds an argument "multiple" to the checkbox ViewHelper which makes it possible to mark the property as multi value even if the bound object is NULL.

Besides the ViewHelper can now be bound to all scalar properties, arrays and Traversable objects.

This change is backwards-compatible.

Change-Id: I2c024d6a0bceaeb65ed04847e76fb44ccc238139

Fixes: #8854

Releases: 1.1
