<b>Sprint:</b>			
<b>PHP Version:</b>			
<b>Has patch:</b>			
<b>Complexity:</b>			
<b>Subject:</b>	We should mention the usage of PHP Error Control Operators in the FLOW3 CGL		
<b>Description</b>	<p>Using the @ Error Control Operator (<a href="http://www.php.net/manual/en/language.operators.errorcontrol.php">http://www.php.net/manual/en/language.operators.errorcontrol.php</a>) to avoid PHP Warnings and Errors is considered bad practice.</p> <p>I couldn't find anything about this in the FLOW3 Best Practices / CGL. IMO this should be added.</p>
