Has patch:			
Tags:			
Subject:	AddToHtmlHead		
Description			
<p>Just a suggestion and I don't know if it does exist already in another case; but here's a ViewHelper i've just written for a custom project:</p>			
<pre>/** * Render the head addition * * @param string \$key the key for additionalHeaderData; useful for overriding * @return void */ public function render(\$key = NULL) { \$textToAdd = \$this->renderChildren(); if(\$key !== NULL) { \$GLOBALS['TSFE']->additionalHeaderData[\$key] = \$textToAdd; } else { \$GLOBALS['TSFE']->additionalHeaderData[] = \$textToAdd; } }</pre>			
Usage:			
<pre><solpersons:addToHtmlHead> <link rel="stylesheet" type="text/css" href="{f:uri.resource(path:'Styles/default.css')}" /> </solpersons:addToHtmlHead> <div class="tx-solpersons-pi1"> <f:render section="main" /> </div></pre>			
...or alternatively			
<pre><solpersons:addToHtmlHead key="tx_solpersons_pi1_headCSS"> <link rel="stylesheet" type="text/css" href="{f:uri.resource(path:'Styles/default.css')}" /> </solpersons:addToHtmlHead></pre>			

Thanks for reading :)

Best,
Adrian

I would suggest rejecting this ticket in favor of FED extension and its numerous ViewHelpers, especially <http://fedext.net/fed-viewhelpers/resource/style.html>.

everyone feel free to kick this; it's definately orphanaged and nobody cares. However; I used that in may projects because it's IMHO the ideal, smart, tiny approach to get it achieved.

Unfortunately I myself am not allowed to cancel this item; I think it's the prj leader's task.
